Structure of a flower

Label the diagram below:

Complete the word fill exercise below and table on the next sheet:

The male part of the	e flower is called th	10	consists of the
and		The female part of	the flower is called
the	consists of the _		and
	The male gamet	e is made in the _	and i
found inside the	gra	in. The female ga	mete is found in the
an	d is called an		

Biology IGCSE: Plant Reproduction

Plant and Animal Cells

Activity 1: Which bit is it?

Which part ...

- ...of an animal cell controls the cell's activities? ...
-of an animal forms a thin layer around the outside?
- 3. ...is a liquid found inside animal cells?
- ...is a green structure found inside plant cells?
- 5. ...is a sac of liquid found inside plant cells?

Activity 2: True or False?

Read each statement and decide whether it is true or false:

- 1. Almost all cells have a nucleus.
- 2. All plant cells contain chloroplasts.
- 3. The cell membrane controls what goes in and out of the cell.
- 4. Animal cells have cell membranes.
- 5. Animal cells have cell walls. ...
- 6. All cells contains some cytoplasm.

Activity 3: Explanations

Match each statement with the correct explanation.

Statement	because	Explanation
Plant and animal cells have many features in common		it is needed to control what goes in and out of the cell
There are some differences between animal and plant cells		they need to perform different functions
Plant cells have a cell wall	Plant cells have a cell wall	
Both plant and animal cells have a cell membrane		they need to perform the same functions
Animal cells do not have chloroplasts		it contains the instructions that control what the cell does
Nearly every type of cell has a nucleus		it gives the cell shape and supports the plant

The Editor is responsible for the final decision regarding acceptance or rejection of articles. Clin Chem 2009; 55: 611-622. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version. Contact details for submission For queries concerning the submission process or journal procedures please visit the Elsevier Support Center. Formatting of necessary to include detailed descriptions on the program or type of grants and awards. This may be a requirement of your funding body or institution. Tables Please ensure that you remove all field codes before submitting the electronic manuscript Elsevier has preprinted forms for use by authors in these cases. For gold open access articles: Upon acceptance of an article, authors will be asked to complete a 'License Agreement' (more information). Indicate all affiliations with a lower- case superscript letter immediately after the author's name and in front of the appropriate address. J. Elsevier centrifugal force must always be in Mayinscula and in italics and the letter "P" that indicates probability values must be Mayinscula and in italics throughout the manuscript . A ¢ A ¢ A amero the illustrations according to their sequence in the text. When the coding terminology is used, we recommend avoiding offensive or exclusive terms, such as common domestic animals. Any addition, elimination or reorganization of the authors in the list of authors should be done only before the manuscript has been accepted and only if approved by the journal editor. Reference style text: All appointments in the text should refer to: 1. The use of inclusive language, the inclusive language recognizes diversity, transmits respect for all people, is sensitive to differences, and promotes equality of opportunities. These preliminary evaluations made by the Editorial Board are based on the scope, novelty, interest, the potential contribution to the field and the quality of science and narrative (in the case of articles of serotua serotua ed abeurp especially with regard to a detailed methods section, and large datasets as supplementary materials. Cytometry A 2008; 73: 926-930). Avoid extensive citations and discussion of published literature. Submission of published literature. Submission of published literature. annotate any corrections on a previous version. MIFlowCyt: The minimum information about a flow cytometry experiment. Should an appeal merit consideration, the Editor-in-Chief will request the authors to provide a response to the reviewers' and Associate Editors' comments and will be then sent out for further peer review. Here you will find everything from Frequently Asked Questions to ways to get in touch. You can also check the status of your submitted article or find out when your accepted article will be published. Three or more authors: first author's name followed by 'et al.' and the year of publication. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). The Editorial Board may request, at any point, the authors to provide the original files (.FCS/.LMD) or the histograms and dot-plots. Use of antibodies Validation of antibodies through peptide blocking experiments is required when immunoblotting (Western blot), immunofluorescence, immunoblotting (Western blot), underlying or relevant datasets in your manuscript by them in your text and including a data reference in your Reference List. Concise and informative. The datasets will be listed and directly accessible to readers next to your published article online. For more information, visit the Mendeley Data for journals page. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. The statement will appear with your published article on ScienceDirect. 2. The address at which the author will, at no cost, receive a customized Share Link providing 50 days free access to the final published version of the article and supply a concise, descriptive caption for each supplementary file. The terms sex and gender should be used correctly. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. Reference to a journal publication with an article number: Van der Geer, J., Hanraads, J.A.J., Lupton, R.A., 2018. Submission checklist. Protein names are written in capitals and are not italicized. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Only one appeal is permitted per Manuscript. Studies in humans and animals If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. Appeals In case of a rejection decision, authors are allowed to submit an appeal, which may be considered by the Editorial Board. TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.Please do not: ¢Ã¢Â Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors; ¢Ã¢Â Supply files that are disproportionately large for the content. Supplementary material Supplementary material such as applications webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Data statement To foster transparency, we encourage you to state the availability of your data in your submission. Results and conclusions should contribute to improving the management of an animal species or population, with regard to its fertility or reproductive efficiency. 281¢ÃÂ304.Reference to a website: Cancer Research UK, 1975. Data linking If you have made your research data available in a data repository, you can link your article directly to the dataset. Preprints Please note that preprints can be shared anywhere at any time, in line with Elsevier's sharing policy. Discussion should range between 1,000 and 1,250 words (approximately 4-5 pages). Important formatting to which all manuscripts should adhere 1. The Share Link can be used for sharing the article via any communication channel, including email and social media. Gene names Authors must use standard gene names, as provided by HGNC. E-Publishing Inc., New York, pp. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including Introduction, Materials and Methods, Results, Discussion and Conclusions). Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identified by their Geneva names when first used in the text. Highlights should be submitted in a separate editable file in the online submission system. Permitted third party reuse of gold open access articles is determined by the author's choice of user license. Author rights to reuse your work. Introduction (labelled with the number 1) State the objectives of the research and provide an adequate background, avoiding a detailed literature survey or a summary of the results. The MIQE Guidelines: Minimum Information for Publication of Quantitative Real-Time PCR Use of terminology - relative abundance of mRNA transcripts as compared with the abundance of mRNA for a reference gene(s). Graphical abstracts should be submitted as a separate file in the online submission system. This includes both fundamental research and applied studies, including management practices that increase our understanding of the biology and manipulation of reproduction. The abbreviation "et al." in the text of the should be in regular font and never be italicized 3. ¢Ã¢Â Embed the used fonts if the application provides that option. There should be indentation of the first line of all paragraphs except for the Abstract of the manuscript 5. Commun. ¢Ã¢Â Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar. The Editorial Board of Animal Reproduction Science has decided not to publish papers in which there is an exclusive examination of the in vitro development of oocytes and embryos; however, there will be consideration of papers that include in vitro studies where the source of the oocytes and/or development of the embryos beyond the blastocyst stage is part of the experimental design. Peer review This journal operates a single anonymized review process. Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. Materials and Methods (labelled with the number 2) Provide sufficient details to allow the research to be reproduced by an independent researcher. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide. Reference management software products. It is important to ensure that all corrections are sent back to us in one communication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail. The Editor's decision is final. 4. The structure of the manuscript must be Abstract, Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgements, Author Contribution Statement, Competing interests statement, References, Figure legends and Tables (if the latter are provided with the Main text file). Avoid usage of italics to emphasize part of the text. Article structure Manuscripts should have numbered lines (continuous numbering across pages) with wide margins and double spacing throughout (i.e., also for abstracts, footnotes and references). Please refer to the "References" section for more information about data citation. ¢Ã¢Â Provide captions to illustrations separately. You can add your name between parentheses in your own script behind the English transliteration. Authorship statements should be formatted with the names of authors first and CRediT role(s) following. PLEASE NOTE: This is a mandatory file for all submissions to Animal Reproduction Science. The manuscripts may be submitted without invitation or be invited reviews and should be submitted using the same process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to Mendeley Data, Both corresponding and co-authors may order offprints at any time via Elsevier's Author Services. If your data is unavailable to access or unsuitable to access or unsuitable to post, you will have the opportunity to indicate why during the submission process, for example by stating that the research data is confidential. Oueries For guestions about the editorial process (including the status of manuscripts under review) or for technical support on submissions, please visit our Support Center. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the print version of the article that refer to this content. Decisions after submitting an appeal are made by the Editor-in-Chief and are final. To request such a change in author list and (b) written confirmation (e-mail, letter) from authors that they agree with the addition, removal or rearrangement. Multiple Corresponding Authors: Please note that only one Corresponding Author can be responsible for the submission in Editorial Manager. In principle, variables are to be presented in italics. Essential Title Page Information Title. Number them consecutively throughout the article. More than one reference from the same author(s) in the same year must be identified by the letters 'a', 'b', 'c', etc., placed after the year of publication. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive. (accessed 13 March 2003). Reference to a dataset: [dataset] Oguro, M., Imahiro, S., Saito, S., Nakashizuka, T., 2015. A summary declaration of interest statement in the title page file (if double anonymized) or the manuscript file (if single anonymized). Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text). organizations that could inappropriately influence (bias) their work. An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement. Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Submission declaration and verification Submission of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for In other places, that its publication is approved by all authors and, tatisfitly or explicitly by the responsible authorities where work was carried out, and that, if accepted, it will not be published in another part of it Form, in English or in any other language, including electronically without the written consent of the copyright holder. Reference to a chapter in a book Edited: Mettam, G.R., Adams, L.B., 2009. The introduction "Set the scene" for research. If linear models are used, the authors should have previously confirmed that paramometric assumptions (normal distribution and homogeneity of variations) are not violated and, when applicable, indicate if linear data transformations or non-paramil tests have been carried out. TRICA. Investigation data This magazine encourages it and allows you to share data that supports your research publication when appropriate, and allows you to intercell the data with its published articles. Consider other diversity attributes, for example. GÃ © Nero, race and ethnicity, race stage, etc. More information. Keep in mind: The first letter of each of the keywords must be in Mayúscula and with a point and eat between each word. The authors are also encouraged to consult with biomers and determine when it is the most appropriate statistical test before studying (for example, GLM, mixed model, linear regression). The integrity of the sperm membrane using double fluorochrome and fluorescence microscopy or flow cytometry should also be evaluated. Review articles should not be more than 10,000 words and do not contain more than eight figures and tables. Summary The summary can not From more than 250 words of length and the details about what must be included in the summary are described later in this document. When it is available, you can directly link your to your article by providing the relevant information in the submission system. Copyright Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (see more information on this). An abstract is often presented separately from the article, so it must be able to stand alone. Abstract is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations. Please have a look at the examples here: example Highlights. Superscript Arabic numerals are used for such footnotes. Do not over-reference statements; two or three key references should suffice unless each adds something specific. There should not be a line spacing between paragraphs 6. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. ¢Ã¢Â Submit each illustration as a separate file.¢Ã¢Â Ensure that color images are accessible to all, including those with impaired color vision. A detailed quide on electronic artwork is available. You are urged to visit this site; some excerpts from the detailed information are given here. Formats If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format. Download Guide for Authors in PDF Animal Reproduction Science publishes results from studies relating to reproduction Science is encouraged. Manuscripts not fulfilling this requirement will be immediately rejected without peer review. Authors should ensure that writing is free from stereotypes, slang, reference to dominant culture and/or cultural assumptions. . Role of the funding source You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. Only the first letter of the manuscript title should be capitalized unless there are specific words that should be capitalized (e.g., breed names, species) 2. If an author has relocated since the research described in the article was conducted, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. Mortality data for Japanese oak wilt disease and surrounding forest compositions. In addition sperm cryopreservation should be preferentially conducted with a controlled-rate freezer to ensure repeatability and standardization. Exceptions to these requirements will be considered. Flow cytometry When performed, the Methods section should provide technical details for flow cytometry experiments, following the recommendations set by the International Society for Advancement of Cytometry (Lee J et al. Furthermore, the format used for the Table and Figure legends should be consistent with that of manuscripts published in this journal. Any such submission is subject to all of the journal's usual procedures, with peer review handled independently of the relevant editor and their research groups. More details and an example. The focus is on animals that are useful to humans including food- and fibre-producing; companion/recreational; captive; and endangered species including zoo animals, but excluding laboratory animals unless the results of the study provide new that impacts the basic understanding of the biology or manipulation of reproductive; and endangered species including laboratory animals unless the results of the study provide new that impacts the basic understanding of the biology or manipulation of reproductive; and endangered species including laboratory animals, but excluding laboratory animals unless the results of the study provide new that impacts the basic understanding of the biology or manipulation of reproductive; and endangered species including laboratory animals unless the results of the study provide new that impacts the basic understanding of the biology or manipulation of reproductive physiology and endocrinology, reproductive cycles, natural and artificial control of reproduction, preservation and use of gametes and embryos, pregnancy and parturition, infertility and sterility, diagnostic and therapeutic techniques. There are no page charges for manuscripts published in Animal Reproduction Science and publication of papers only takes place after rigorous peer review. Only the first letter of titles should be capitalized unless using words that need to be capitalized (e.g., breed name - Cashmere goats, Holstein cows Author names and affiliations.
